## Material Safety Data Sheet

# GLUCOFLEX

1. **Product Name** Glucoflex
2. **Information on Ingredients**  
Composition

Protein	8.45%
Oil	<0.5%
Fibre	<0.1%
Ash	0.1%
Moisture	78.1%
Carbohydrate	12.6%
3. **Hazards Identification**  
Symptoms relating to use
  - Inhalation Not applicable
  - Skin contact Risk of burning above 45°C
  - Eye contact Not expected to cause a significant eye contact hazard under anticipated conditions of normal use.
  - Ingestion None under normal conditions.
4. **First Aid Measures**
  - Inhalation Not applicable
  - Eye contact Flush with lukewarm water for 15 minutes. Get medical attention if irritation results.
5. **Fire – fighting measures**  
Extinguishing media Carbon dioxide, dry chemicals, foam, water spray (fog).

- 6. Accidental release measures**
- |                           |                                                                                   |
|---------------------------|-----------------------------------------------------------------------------------|
| Personal precautions      | None under normal conditions                                                      |
| Environmental precautions | Biodegradable                                                                     |
| After spillage / leakage  | Can be hosed down in normal sewage with plenty of hot water.<br>Slippery walking. |
- 7. Handling and storage**
- |         |                                                                                                       |
|---------|-------------------------------------------------------------------------------------------------------|
| Storage | Avoid microbiological contamination. Prevent condensation at surface. Store in a sealed storage tank. |
|---------|-------------------------------------------------------------------------------------------------------|
- 8. Exposure controls / personal protection**
- |                         |                              |
|-------------------------|------------------------------|
| Personal protection     |                              |
| -Respiratory protection | None under normal conditions |
| -Hand protection        | Heat protection above 45°C   |
- 9. Physical and Chemical properties**
- |                               |                  |
|-------------------------------|------------------|
| Appearance                    | Viscous liquid.  |
| Colour                        | Brown            |
| Odour                         | Odourless        |
| Initial boiling point         | >100 °C          |
| Density (g/ltr)               |                  |
| Solubility in water (%weight) | Soluble in water |
- 10. Stability and reactivity**
- |                    |                             |
|--------------------|-----------------------------|
| Materials to avoid | Strong acids and oxidizers. |
|--------------------|-----------------------------|
- 11. Toxicological information**
- Non-toxic under normal conditions of use.
- 12. Ecological information**
- No significant environmental hazard or adverse effect from human exposure resulting from the accidental release of this material is anticipated.
- 13. Disposal considerations**
- Send to landfill or incinerate. Federal, state or local regulation should be observed.
- 14. Transportation information**
- Not applicable
- 15. Other information**
- |                  |                      |
|------------------|----------------------|
| Recommended uses | Equine Nutraceutical |
|------------------|----------------------|
