

# Invest in CALPHORMIN

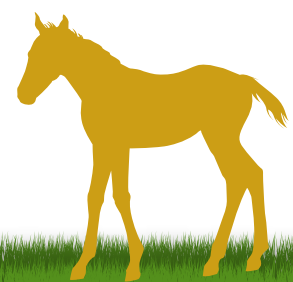

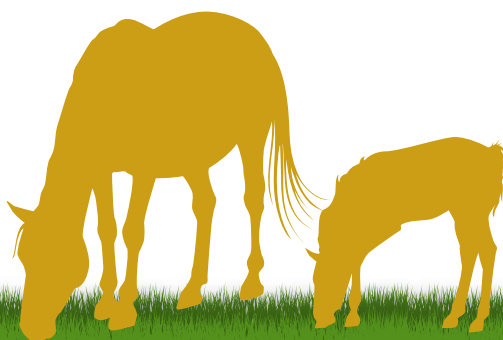

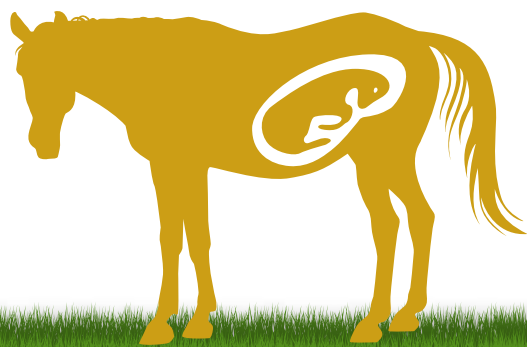

CALPHORMIN contains a balanced combination of  
MACRO-MINERALS, TRACE MINERALS, AMINO ACIDS

& THE ADDED BENEFIT OF SODIUM ZEOLITE A  
BIOAVAILABLE SILICON-CONTAINING COMPOUND

## When to Feed?

of total skeletal development will take place during the FINAL 3 MONTHS OF FOETAL DEVELOPMENT and during the FIRST 8 MONTHS OF THE FOAL'S GROWTH.

### MARES

During the last three months of pregnancy (months 9,10 and 11) and during the subsequent lactation.

### FOALS

At weaning

### YEARLINGS

& TWO YEAR OLDS  
CALPHORMIN is recommended to be fed continually until full skeletal maturity is reached

#### CALPHORMIN CONTAINS

**CALCIUM & PHOSPHOROUS**  
- For the development of bones & teeth

#### SODIUM ZEOLITE

- Enhances bone calcification and is present in large quantities of connective tissue.

#### LYSINE

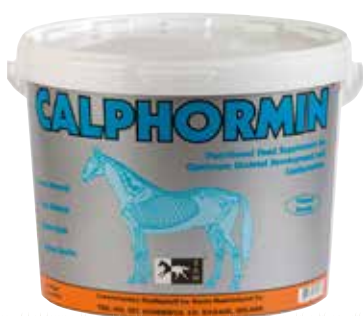

- First Limiting amino acid in the diet of growing foals. Inadequate intake results in decreased growth and development.

#### ZINC, COPPER, MANGANESE

- Essential trace minerals, Deficiencies of which are associated with DOD, Epiphysitis.

#### MSM

- Source of bioavailable sulphur. Sulphur is needed for the synthesis of connective tissue.

**20Kg**  
167 days supply

**10Kg**  
84 days supply

**3Kg**  
25 days supply
